PRODUCT NUMBER EXPLANATION:

1. If there is only a product reference, it means that the whole products are white.
2. If there is a "/xx"(xx represents the colour reference) behind the product reference, it means that the front plate of this product is colourful with the function part and insert to be white.
3. If there are 2 "/xx" behind the product reference, it means that the front plate and function part are both colourful with insert to be white.
4. If there are 3 "/xx" behind the product reference, it means that the whole products are colourful. The whole products would be the same colour if the colour reference of the 3 "/xx" is the same. Otherwise, the whole products would not be the same colour.
